

About MNIT Jaipur

Malaviya National Institute of Technology Jaipur (MNIT Jaipur) is one of the 31 premier institutions of national importance established under the NIT Act, 2007, and is fully funded by the Government of India. Originally founded in 1963 as Malaviya Regional Engineering College (MREC), it was elevated to the status of a National Institute of Technology in 2002. The Institute offers undergraduate, postgraduate, and doctoral programs in Engineering, Architecture, Science, Management, and Humanities. With a strong focus on research, innovation, and entrepreneurship, MNIT Jaipur actively collaborates with leading academic institutions, industries, and research organizations across the globe. The Institute currently offers nine undergraduate and thirty plus postgraduate programmes, along with Ph.D. programmes in various disciplines. <https://www.mnit.ac.in>

14TH INTERNATIONAL CONFERENCE ON PRECISION, MESO, MICRO AND NANO ENGINEERING

COPEN 14

18th – 20th December 2026

THEME

Precision Manufacturing:
Driving India's Self-Reliance
(आत्मनिर्भारताय: सटीकनिर्माणम्)

ABOUT COPEN 14

The Conference on Precision Engineering (COPEN) was spearheaded by IIT Madras in 2000 to bring the academicians, researchers and practicing engineers for sharing their experiences in the field of precision engineering. It has gained wide acclaim over the years and reached an international status in 2006. The 14th international Conference on Precision, Meso, Micro and Nano Engineering will be held at MNIT Jaipur from 18-20 December 2026. <https://www.copen.ac.in>.

THEME OF COPEN 14

Precision Manufacturing: Driving India's Self-Reliance

As India accelerates towards advanced manufacturing and digitalization, precision manufacturing serves as the backbone for producing high-quality, cost-effective components across sectors. COPEN 14 aims to provide a platform where all stakeholders converge to share advancements, best practices, and collaborative solutions, thereby catalyzing India's journey towards self-reliance through sustainable, high-precision, and technologically advanced manufacturing practices by integrating cutting-edge technologies to reduce dependence on imports, enhance competitiveness, and foster innovation.

High quality research papers are invited in the following areas, but not limited to:

- Additive Manufacturing
- Advances in Casting and Welding
- Advances in Engineering Materials
- Advances in Traditional and Non-Traditional Machining
- Beam Technologies in Manufacturing
- CAD / CAM / CAE / Reverse Engineering
- Composites and Polymer Processing
- Cyber-Physical Systems
- Design for Manufacturing
- Digital Manufacturing
- Electronics Manufacturing and Assembly
- Forming and Consolidation Processes
- Green and Inclusive Manufacturing
- Hybrid Manufacturing
- Industrial Engineering and Manufacturing Process Control
- Industry 4.0 and IoT
- Manufacturing for Aerospace / Space Applications
- Manufacturing for Bio-Medical Applications
- Precision Manufacturing for Textile Machineries
- Precision Manufacturing for Farm Machineries
- Precision Manufacturing for Mining and Tunnelling Machineries
- Metrology and Quality Engineering
- Micro / Nano Fabrication
- Modelling and Simulation in Manufacturing
- Robotics and AI/ML for Precision Engineering
- Smart Manufacturing and Automation
- Precision Engineering for Surface Applications
- Trends in Manufacturing

Efforts will be made to publish the selected good quality research papers in some selected SCI/SCIE/SCOPUS journals.

Some curtain raiser events and pre-conference workshops will be organized in the selected areas.
